

# ELAN | SRE 3050 - Frequently Asked Questions

What are the differences between the SRE-3000 Elan and the new SRE-3050 Elan?  
Are there any changes/updates to the SRE-2010 Elite?

## SEAT FEATURES

**Color Refresh** - Seating material, shrouding, stand feet and end plates on rail all updated in color from Champagne (SRE-3000) to Warm Gray (SRE-3050).

**More Room** - Additional space between armrests at 20.25" and increased seat depth to 16.75".

**Ergonomic Paddle Switch** - Easier to operate. Comes standard on left arm. Can be changed to right hand side in less than 10 minutes.

**Armrests** - Redesigned wire routing improves reliability and eliminates pinch points. Paddle switch activates with armrest in either the up or down position unless required otherwise by code.

**Retractable Seat Belt** - Easy to wear and one hand operation. Positioned on seat to allow client to sit fully back in seat comfortably.

**Folded Position** - Seat cushion folds flush with armrests in upright position. Unit folded to wall same as SRE-3000 at 12". Seat damper lowers bottom seat cushion smoothly.

**Attractive Design** - Underside of footrest and seat bottom lends to clean modern aesthetic.

## UNIVERSAL RAIL DESIGN

**Universal Rail Design** - Same lightweight design and anodized finish with narrowest profile in industry at 2.25". Updated stand feet/end plates in new Warm Gray finish. Interchangeable between SRE-3000, SRE-3050 & SRE-2010 models.

**New Nominal Rail Length** - Total rail length was updated to align with industry standards at overall dimension of 181.5". Less than 2% of applications will be impacted and limits waste of unused rail segments.

SRE-2010 Elite will change to new rail kits mid-November. Look for updates on rail boxes and changes to installation manual to determine overall rail length.

# ELAN | SRE 3050 - Frequently Asked Questions

What are the differences between the SRE-3000 Elan and the new SRE-3050 Elan options and service kits?
